Neoliberalism is easily one of the strongest concepts that has been published in social sciences over the past two decades, and the number of scientists who write about the dynamic and unfolding process of socio-spatial transformation is astonishing. Even more surprising, however, is that so far there has been no attempt to provide a wide range of registers of neoliberalism. The Handbook of Neoliberalism intends to provide a broad overview of the phenomenon of neoliberalism, examining a number of ways in which it has been transposed into theory, popularism, criticism and practice in many geographical and institutional areas. With the help of more than 50 leading authors around the world, the seven sections of the volume provide a systematic overview of the origins, political aspects of neoliberalism, social tensions, knowledge productions, spaces, nature and the environment, as well as the management of ongoing and emerging debates. The volume aims to provide the first comprehensive overview of the field and advance the established and emerging debates in an area that has grown exponentially over the past two decades, coinciding with the meteoric rise of neoliberalism such as hegemonic ideology, state form, politics and the program, as well as government. This includes a substantive introductory chapter and will serve as an invaluable resource for students, postgraduate students, and professional scientists alike. Part 1 Origins Part 2 Political Aspects Part 3 Social Tensions Part 4 Knowledge Productions Part 5 Spaces Part 6 Natures and Environments Part 7 Aftermaths Chapter Welcome to the manual of neoliberalism, a volume that provides the most complete overview of the field to date. The chapters presented reveal the phenomenon of neoliberalism, examining the ways in which it has been put forward, promoted, criticised and put into practice in different geographical locations and institutional frameworks. Neoliberalism is easily one of the strongest concepts that has been published in social sciences over the past two decades, and the number of scientists who are now writing about the dynamic and unfolding process of socio-spatial transformation is nothing more than astonishing. More surprisingly, however, there has been no attempt to several registers in which neoliberalism has evolved. The handbook of neoliberalism has been gathered with the specific aim of changing this and intends to serve as a fundamental guide to this vast spiritual landscape.
